Daily practices include:
• Striving to spend at least 50% of the day outdoors. Our staff is ready to embrace all weather and help children do the same.
• Using natural materials for our crafts and play.
• Modeling environmental practices by composting, recycling and limiting single use plastics.
• Encouraging trash free lunches.
• Integrating families into the community with family participation programs throughout the year.

Our facility
• Located within a county park, bordering thousands of acres of state park.
• Onsite animal friends include a terrapin, screech owl and corn snake.
• Two interactive classrooms and a covered patio.
• A natural play area with climbing log, stump jump, musical fence, teepee, “nature store” and more.
• And all the wonders of nature!

Please let us know your interest in a nature preschool by completing this short survey:
